

SHISHUPAL KUMAR LOHANI

Software Engineer – Java & Springboot

Mob: 7903481464 | Email: shishupallohani26@gmail.com | LinkedIn: <https://www.linkedin.com/in/shishupallohani>
GitHub: <https://github.com/shishupallohani> | Portal: <https://shishupallohani.github.io> | Location: Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Results-driven Java Backend Developer with **4+** years of experience designing scalable microservices in the healthcare and hospitality domains. Architected core modules of ICMS — a high-volume TPA platform processing 5,000+ claims/day across Corporate, Member, Insurer, and Provider portals. Proficient in Java 21, Spring Boot, Spring Security, Keycloak (OAuth2), JWT, JPA/Hibernate, Kafka, PostgreSQL, Redis, and AWS S3. Collaborated on CI/CD pipelines using Jenkins, Docker & Kubernetes, working in Agile/Scrum teams with production monitoring via Grafana.

PROFESSIONAL EXPERIENCE

Consint Solution Pvt. Ltd.

(Project transitioned from Track Four Infotec Pvt. Ltd.)

Feb 2025 – Mar 2026

Noida, Uttar Pradesh, India

Role: Java SpringBoot Backend Developer

Project: ICMS(Integrated Claims Management System)

Client: Health Insurance TPA of India Ltd. (HITPA)

Tech: Java 21, SpringBoot, Keycloak, OAuth2, Spring Data JPA, Hibernate, PostgreSQL, Redis, Kafka, Docker, Kubernetes, Jenkins, Grafana, JUnit 5, Mockito

- Developed and maintained **Microservices** for Pre-Authorization and Claims modules, supporting 5,000+ claim transactions per day with high availability.
- Designed and implemented secure **REST APIs** integrated across Corporate, Member, Insurer, and Provider portals, enabling seamless inter-portal data exchange for a team of 10+ developers.
- Designed and implemented a secure authentication and authorization system using **Keycloak (OAuth2)** with custom **JWT** validation, ensuring robust **RBAC** across all portal integrations.
- Built business validation logic for claim lifecycle workflows (submission → adjudication → settlement), reducing manual processing errors significantly.
- Developed high-volume CRUD operations using **Spring Data JPA** and **Hibernate** for transactional claim and pre-auth data, optimizing query performance for **Postgres**.
- Wrote unit and integration tests using **JUnit 5** and **Mockito**, maintaining code coverage across critical claim processing modules.
- Monitored system health and performed root cause analysis using **Grafana dashboards** and structured log analysis, reducing average resolution time for production issues.
- Participated in **CI/CD** pipeline using **Jenkins**, **Docker**, and **Kubernetes** for containerized microservice deployment and scaling.

Garg Data Information Pvt. Ltd.

Role: Java Backend Developer

June 2024 – Dec 2024

Noida, Uttar Pradesh, India

Project: BSS Procure-to-Pay

Client: Marriott, Hyatt, Hilton

Tech: Java, Spring Boot, Spring MVC, Hibernate, MySQL, ReactJs, Maven, Apache Tomcat

- Developed and optimized **Spring MVC** controllers and **REST APIs** for Procure-to-Pay modules including eProcurement, AP Automation, and Inventory Control for leading hospitality brands.
- Integrated **Hibernate ORM** with **Spring** for transactional persistence of Purchase Orders, Invoices, and Inventory data on **MySQL**.
- Implemented business logic in service and **DAO layers**, collaborating with frontend team to deliver dynamic, responsive UI features using **JavaScript**.
- Worked in **Agile (Scrum)** environment — sprint planning, daily stand-ups, and retrospectives — ensuring timely feature delivery.

Webearn Solution Pvt. Ltd.

Role: Java Spring Boot Backend Developer

Apr 2022 - June 2024

Noida, Uttar Pradesh, India

Project: HPH Connect

Client: Harvard Pilgrim Health Care, USA

Tech: Java, Spring Boot, Spring MVC, Hibernate, MySQL, REST APIs, Swagger, Postman

- Built **RESTful APIs** for user account management, policy renewals, and claim approval notification system for a US-based health insurance platform

- Developed backend modules using **Spring Boot, Hibernate**, and layered architecture (**RestController → Service → DAO → Entity**), ensuring clean separation of concerns
- Designed an actionable reporting dashboard providing real-time insights to brokers, providers, and members

TECHNICAL SKILLS

Programming Languages: Java
Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate
Security: JWT, JSON Web Token Validation, Keycloak, OAuth 2.0, Role-Based Access Control, RBAC
Microservices and APIs: Microservices Architecture, REST APIs, API Gateway, Service Discovery, Eureka
Api Testing Tools: Postman,Swagger
Databases: MySQL, PostgreSQL, Microsoft SQL Server(MSSQL)
DevOps and Tools: Docker, Kubernetes, Jenkins, AWS S3
Testing and Monitoring: JUnit 5, Mockito, JMeter, Grafana
Logging: SLF4J
IDEs: IntelliJ IDEA, Spring Tool Suite
Application Servers: Apache Tomcat, Oracle WebLogic
Core Concepts: Object-Oriented Programming, OOP, Collections, Multithreading, Design Patterns, Exception Handling
Methodologies: Agile, Scrum
Messaging & Streaming: Apache Kafka (Event Publishing / Producer)
Cloud: AWS (S3)

EDUCATION

MCA – Master of Computer Applications	Chandigarh University, Mohali
B.Sc – Bachelor of Science	Magadh University, Bihar
