

# SHISHUPAL KUMAR LOHANI

## Java Spring Boot Backend Developer

**Mob:** 7903481464 | **Email:** [shishupallohani26@gmail.com](mailto:shishupallohani26@gmail.com) | **LinkedIn:** <https://www.linkedin.com/in/shishupallohani>  
**GitHub:** <https://github.com/shishupallohani> | **Portal:** <https://shishupallohani.github.io> | **Location:** Noida, Uttar Pradesh

### PROFESSIONAL SUMMARY

Results-driven Java Backend Developer with 4+ years of experience designing scalable microservices in the healthcare and hospitality domains. Contributed to core ICMS modules for a high-volume TPA platform processing 5,000+ claims/day across Corporate, Member, Insurer, and Provider portals. Experienced with Java 21, Spring Boot, Spring Security, Keycloak (OAuth2), JWT, JPA/Hibernate, Kafka, PostgreSQL, Redis, and AWS S3. Worked with CI/CD using Jenkins, Docker & Kubernetes in Agile/Scrum teams with production monitoring via Grafana.

### PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                     |

- Developed backend modules using Spring Boot, Hibernate, and layered architecture (Rest Controllers , Service , DAO ,Entity), ensuring clean separation of concerns.
- Designed an actionable reporting dashboard providing real-time insights to brokers, providers, and members.

TECHNICAL SKILLS

---

**Programming Languages:** Java,Java17,Java21  
**Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate  
**Security:** Keycloak, OAuth 2.0, JWT, Role-Based Access Control (RBAC)  
**Microservices and APIs:** Microservices, REST APIs, API Gateway, Config Server, Service Discovery (Eureka), OpenFeign, Resilience4j  
**Api Testing Tools:** Postman,Swagger(OpenAPI)  
**Databases:** PostgreSQL, MySQL, Microsoft SQL Server (MSSQL)  
**DevOps and Tools:** Docker, Kubernetes, Jenkins, AWS S3,Git,GitLab  
**Testing and Monitoring:** JUnit 5, Mockito, JMeter, Grafana  
**Logging:** SLF4J,Logback  
**IDEs:** IntelliJ IDEA, Spring Tool Suite  
**Application Servers:** Apache Tomcat, Oracle WebLogic  
**Core Concepts:** Object-Oriented Programming (OOP), Collections, Multithreading, Exception Handling, Design Patterns  
**Methodologies:** Agile, Scrum  
**Messaging & Streaming:** Apache Kafka (Event Publishing / Producer)  
**Cloud:** AWS (S3)
