

SHISHUPAL KUMAR LOHANI

Java Spring Boot Backend Developer

Mob: 7903481464 | **Email:** shishupallohani26@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/shishupallohani>
GitHub: <https://github.com/shishupallohani> | **Portfolio:** <https://shishupallohani.github.io> | **Location:** Noida, Uttar Pradesh

PROFESSIONAL SUMMARY

Results-driven Java Backend Developer with 5+ years of experience designing scalable microservices in the healthcare and hospitality domains. Contributed to core ICMS modules for a high-volume TPA platform processing 5,000+ claims/day across Corporate, Member, Insurer and Provider portals. Experienced with Java 21, Spring Boot, Spring Security, Keycloak (OAuth2), JWT, JPA/Hibernate and PostgreSQL. Worked with CI/CD using Jenkins, Docker & Kubernetes in Agile/Scrum teams with production monitoring via Grafana.

PROFESSIONAL EXPERIENCE

Consint Solution Pvt. Ltd.

(Project transitioned from Track Four Infotec Pvt. Ltd.)

Feb 2025 – Mar 2026

Noida, Uttar Pradesh, India

Role: Java Spring Boot Backend Developer

Project: ICMS (Integrated Claims Management System)

Client: Health Insurance TPA of India Ltd. (HITPA)

Tech: Java 21, Spring Boot, Keycloak, OAuth2, Spring Data JPA, Hibernate, PostgreSQL, Redis, Kafka, Docker, Kubernetes, Jenkins, Grafana, JUnit 5, Mockito and SonarQube

- Developed and maintained microservices for Pre-Authorization and Claims modules, supporting 5,000+ claim transactions/day with high availability.
- Developed secure RESTful APIs integrated across Corporate, Member, Insurer, and Provider portals, enabling seamless inter-portal data exchange across the platform.
- Implemented secure authentication and authorization using Keycloak (OAuth2) with JWT validation, ensuring RBAC across portal integrations.
- Built business validation logic for claim lifecycle workflows (submission, adjudication, settlement), improving processing accuracy.
- Developed CRUD operations using Spring Data JPA and Hibernate for transactional claim and pre-auth data, optimizing queries for PostgreSQL.
- Wrote unit and integration tests using JUnit 5 and Mockito for critical claim processing modules.
- Monitored system health and analyzed production issues using Grafana dashboards and structured logs.
- Worked with CI/CD using Jenkins, Docker, and Kubernetes for microservice deployment.

Garg Data Information Pvt. Ltd.

Role: Java Backend Developer

Project: BSS Procure-to-Pay

Client: Marriott, Hyatt, Hilton

Tech: Java, Spring Boot, Spring MVC, Hibernate, MySQL, ReactJs, Maven, Apache Tomcat and AWS

June 2024 – Dec 2024

Noida, Uttar Pradesh, India

- Developed Spring MVC controllers and RESTful APIs for Procure-to-Pay modules, including eProcurement, AP Automation, and Inventory Control for leading hospitality brands.
- Used Hibernate ORM with Spring for transactional persistence of Purchase Orders, Invoices, and Inventory data on MySQL.
- Implemented business logic in service and DAO layers, collaborating with the frontend team to support responsive UI features using JavaScript.
- Worked in an Agile (Scrum) environment, participating in sprint planning, daily stand-ups, and retrospectives.

Webearn Solution Pvt. Ltd.

Role: Java Spring Boot Backend Developer

Project: HPH Connect

Client: Harvard Pilgrim Health Care, USA

Tech: Java, Spring Boot, Spring MVC, Hibernate, MySQL, RESTful APIs, Swagger, Postman

Jan 2021 - June 2024

Noida, Uttar Pradesh, India

- Developed RESTful APIs for user account management, policy renewals, and claim approval notifications for a US-based health insurance platform.
- Collaborated using Git and GitLab for version control and code reviews.

- Developed backend modules using Spring Boot, Hibernate, and layered architecture (REST Controllers , Service , DAO ,Entity), ensuring clean separation of concerns.
- Designed an actionable reporting dashboard providing real-time insights to brokers, providers, and members.

TECHNICAL SKILLS

Programming Languages: Java 17,Java 21
Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate
Security: Keycloak, OAuth 2.0, JWT, Role-Based Access Control (RBAC)
Microservices and APIs: Microservices, REST APIs, API Gateway, Config Server, Service Discovery(Eureka), OpenFeign, Resilience4j
API Testing Tools: Postman , Swagger (OpenAPI)
Databases: PostgreSQL, MySQL, Microsoft SQL Server (MSSQL)
DevOps and Tools: Docker, Kubernetes, Jenkins, AWS(S3), Git, GitHub,GitLab
Testing and Monitoring: SonarQube, JUnit 5, Mockito, JMeter, Grafana
Logging: SLF4J,Logback
IDEs: IntelliJ IDEA, VS Code,Spring Tool Suite
Application Servers: Apache Tomcat, Oracle WebLogic
Core Concepts: Object-Oriented Programming (OOP), Collection, Multithreading, Exception Handling, Design Patterns
Methodologies: Agile, Scrum
Messaging & Streaming: Apache Kafka (Event Publishing / Producer)

EDUCATION

MCA – Master of Computer Applications. (2024 - 2026)	Chandigarh University, Mohali
B.SC – Bachelor of Science. (2017 - 2020)	Magadh University, Bihar
