PROFESSIONAL SUMMARY

Software Engineer with **4** years of experience specializing in backend and distributed systems, with hands-on expertise in building domain-intensive microservices using Java 21 and Spring Boot. Specialized in the health insurance domain, having architected and delivered key modules of ICMS (Integrated Claims Management System) — a high-volume TPA platform processing 5,000+ claims per day across Corporate, Member, and Provider portals spanning multiple branches. Proficient in REST API design, JWT/Keycloak-based security, JPA/Hibernate, and cloud-native deployment using Docker and Kubernetes.

EXPERIENCE

Software Developer Consint Solution Pvt. Ltd. (Project transitioned from Track Four Infotec Pvt. Ltd.)	Feb 2025 – Mar 2026
Developed and maintained microservices for Pre-Authorization and Claims modules using Spring Boot. Designed and implemented REST APIs integrated with Corporate, Member, Insurer, and Provider portals. Implemented business validation logic for claim processing workflows. Integrated authentication and authorization using Keycloak and JWT. Developed CRUD operations for high-volume transactional data using Spring Data JPA and Hibernate. Wrote unit and integration tests using JUnit and Mockito. Analyzed and resolved production issues through root cause analysis and log monitoring. Used Grafana and JMeter for monitoring and performance validation.	
Software Engineer Garg Data Information Pvt. Ltd.	June 2024 – Dec 2024
Contributed to backend development of enterprise web applications using Java and Spring Boot. Developed RESTful services and integrated with frontend modules. Designed and optimized SQL queries for MySQL and MSSQL databases. Participated in Agile ceremonies and collaborated with cross-functional teams.	
Software Engineer Webearn Solution Pvt. Ltd.	Apr 2022 - June 2024
Implemented REST APIs and database operations for business workflows. Worked on bug fixing, enhancement requests, and deployment support. Assisted in application deployment on Apache Tomcat server.	

PROJECT EXPERIENCE

Consint Solution Pvt. Ltd. Client: Health Insurance TPA of India Ltd. (HITPA) Java 21, Spring Boot, Keycloak, Docker, K8s, Jenkins
- Developed and maintained microservices for Pre-Authorization and Claims modules, supporting 5,000+ claim transactions per day with high availability. - Designed and implemented secure REST APIs integrated across Corporate, Member, Insurer, and Provider portals, enabling seamless inter-portal data exchange for a team of 10+ developers. - Designed and implemented a secure authentication and authorization system using Keycloak (OAuth2) with custom JWT validation, ensuring robust RBAC across all portal integrations. - Built business validation logic for claim lifecycle workflows (submission → adjudication → settlement), reducing manual processing errors significantly. - Developed high-volume CRUD operations using Spring Data JPA and Hibernate for transactional claim and pre-auth data, optimizing query performance for Postgres. - Wrote unit and integration tests using JUnit 5 and Mockito, maintaining code coverage across critical claim processing modules. - Monitored system health and performed root cause analysis using Grafana dashboards and structured log analysis, reducing average resolution time for production issues. - Participated in CI/CD pipeline using Jenkins, Docker, and Kubernetes for containerized microservice deployment and scaling.

TECHNICAL SKILLS

Programming Languages: Java
Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate
Security: JWT, JSON Web Token Validation, Keycloak, OAuth 2.0, Role-Based Access Control, RBAC
Microservices and APIs: Microservices Architecture, REST APIs, API Gateway, Service Discovery, Eureka
Api Testing Tools: Postman,Swagger
Databases: MySQL, PostgreSQL, Microsoft SQL Server(MSSQL)
DevOps and Tools: Docker, Kubernetes, Jenkins, CI/CD, Maven, Git, GitLab
Testing and Monitoring: JUnit 5, Mockito, JMeter, Grafana
Logging: SLF4J
IDEs: IntelliJ IDEA, Spring Tool Suite
Application Servers: Apache Tomcat, Oracle WebLogic
Core Concepts: Object-Oriented Programming, OOP, Collections, Multithreading, Design Patterns, Exception Handling
Methodologies: Agile, Scrum

EDUCATION

MCA – Master of Computer Applications	Chandigarh University, Mohali
B.Sc – Bachelor of Science	Magadh University, Bihar
